

ICDL Computer & Online Essentials - Practical Test

General Guidelines

- Complete all tasks in the order presented
 - Take screenshots where indicated for verification
 - Write brief explanations for theoretical questions
 - Time yourself to simulate exam conditions
 - Practice on different operating systems when possible
-

TEST 1: COMPUTERS AND DEVICES

Part A: Hardware Identification (20 points)

Task 1.1 (5 points) Create a document listing the main differences between:

- Desktop computers vs. Laptops
- Tablets vs. Smartphones Include at least 3 differences for each comparison.

Task 1.2 (5 points) On your computer, identify and take screenshots of:

- 3 different input/output ports
- Label each port type (USB, HDMI, VGA, etc.)
- Explain what each port is typically used for

Task 1.3 (5 points) Connect a USB device to your computer:

- Document the connection process
- Show how the device appears in file manager
- Safely disconnect the device
- Screenshot each step

Part B: System Operations (15 points)

Task 1.5 (5 points) Demonstrate proper shutdown procedures:

- Log off your current user account
- Log back in (or switch to another user if available)
- Restart your computer
- Document the time it takes for each operation

Task 1.6 (5 points) Take a screenshot of:

- Your desktop showing at least 3 different file type icons
- Your taskbar/dock showing running applications
- A folder containing mixed file types

Task 1.7 (5 points) Identify the operating system you're using:

- Version number
- System specifications (RAM, processor, storage)
- Screenshot of system information window

Part C: Software Recognition (15 points)

Task 1.8 (5 points) Create a table listing:

- 5 applications installed on your computer
- Categorize each as: Office Productivity, Web Browser, Communications, Design, or Other
- Explain the primary function of each

Task 1.9 (5 points) Access an online application:

- Open a web-based application (Google Docs, Office 365, etc.)
- Screenshot the application interface
- Explain the difference between this and locally installed software

Task 1.10 (5 points) Research and list 3 examples each of:

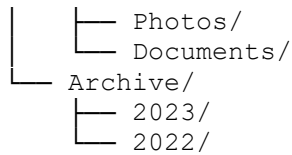

- Operating systems for computers
- Operating systems for mobile devices
- Web browsers

TEST 2: MANAGING FILES AND APPLICATIONS

Part A: File Management Basics (25 points)

Task 2.1 (10 points) Create a hierarchical folder structure:

```
Projects/  
├── 2024_Work/  
│   ├── Budget/  
│   ├── Reports/  
│   └── Presentations/  
└── Personal/
```

- Screenshot your completed folder structure
- Create at least one sample file in each folder

Task 2.2 (5 points) File naming exercise:

- Create 5 files with poor names (Document1.doc, etc.)
- Rename them using good naming practices
- Explain your naming convention
- Before and after screenshots

Task 2.3 (5 points) Selection and organization:

- Create 10 mixed files (different types)
- Select all files of the same type
- Select non-adjacent files
- Select adjacent files
- Screenshot each selection method

Task 2.4 (5 points) Copy and move operations:

- Copy 3 files to a different folder
- Move 3 files to another location
- Demonstrate copying between different drives (if available)
- Show recycle bin contents after deleting files

Part B: Search and Properties (15 points)

Task 2.5 (5 points) Search exercises:

- Search for files by name using wildcards
- Search for files modified in the last week
- Search for files containing specific text
- Screenshot search results for each

Task 2.6 (5 points) File properties investigation:

- Select 3 different file types
- Show properties for each (size, date modified, location)
- Calculate total size of a folder with multiple files
- Screenshot properties windows

Task 2.7 (5 points) View and sort demonstration:

- Show files in 4 different view modes (icons, list, details, tiles)
- Sort files by name, size, type, and date
- Screenshot each view and sort combination

Part C: Storage and Applications (10 points)

Task 2.8 (5 points) Storage analysis:

- Identify all storage devices on your system
 - Note capacity and free space for each
 - Create a file size comparison showing KB, MB, GB examples
 - Screenshot disk usage information
-

TEST 3: NETWORKS

Part A: Network Concepts (20 points)

Task 3.1 (10 points) Network investigation:

- Identify your current network connection type
- Find your IP address
- Test internet speed using an online tool
- Screenshot network settings and speed test results
- Explain the purpose of the network you're connected to

Task 3.2 (5 points) Download and upload demonstration:

- Download a small file (image or document) from the internet
- Upload a file to a cloud storage service or email
- Measure and record the time taken for each
- Screenshot the download/upload process

Task 3.3 (5 points) Internet usage survey:

- List 5 different ways you personally use the internet
- For each, categorize as: Information, Communication, Commerce, Entertainment, etc.
- Explain how each use benefits you

Part B: Network Access (30 points)

Task 3.4 (15 points) WiFi network management:

- View available wireless networks
- Screenshot the network list showing protected and open networks
- If possible, connect to a different network
- Document the connection process
- Show how to disconnect from a network

Task 3.5 (10 points) Network security assessment:

- Identify security features of your current network
- Explain the difference between secure and open networks
- Screenshot network security information
- List potential risks of using open networks

Task 3.6 (5 points) Connection alternatives:

- Research available internet connection options in your area
- List at least 3 different connection types (wired, wireless, mobile)
- Compare speeds and costs
- Recommend the best option for different user needs

TEST 4: ONLINE INFORMATION

Part A: Web Fundamentals (15 points)

Task 4.1 (5 points) URL analysis:

- Find 3 different websites
- Break down each URL into its components (protocol, domain, path)
- Identify secure (HTTPS) vs. unsecure (HTTP) sites
- Screenshot examples of each component

Task 4.3 (5 points) Search engine comparison:

- Perform the same search on 3 different search engines
- Compare the first 5 results from each
- Note differences in results and ranking
- Screenshot the result pages
- Use date filtering to find recent information
- Filter by language or region

Task 4.6 (5 points) Search evaluation:

- Search for information on a current topic

- Evaluate the credibility of 3 different sources
- Check publication dates and authors
- Explain why you would or wouldn't trust each source

Task 4.8 (5 points) Web content handling:

- Download an image from a website
- Print a web page selection to PDF
- Save a web page for offline viewi
