

Formatting Text

Changing text attributes

1. **Select** the second line in the first paragraph.
 - a. In the **Font** group, **apply** the **Bold**, **Italic** and **Underline** attributes. 
 - i. **Notice** how the **Underline** button is a **split button**. **Click** the **button proper**.
 - b. **Notice** how the buttons darken when they are active. When the buttons are active, it means that these formatting options are applied to the selected text.
 - c. **Deselect** the text to see the changes.
 2. **Select** the third paragraph.
 - a. **Click** the **Font** drop-down list box and **click** a different font (CurlzMT).
 - i. **Notice** that the font names are in **alphabetical order**.
 - ii. **Notice** that, as you move your mouse over various fonts, Word shows you what your selected text will look like with that font. This is called a **Live Preview**.

Tip: A “font face” can also be referred to as a “**font name**” or just a “**font**”. 

 - b. **Click** the **font size** drop-down combo box and **click** a different font size (20). **Notice** the Live Preview.
3. **Select** the first paragraph.
 - a. Using the **list arrow** next to the **Font Color** button **change** the **font color** to **blue**. **Notice** the Live Preview as you mouse over the colors in the palette.
 - b. Also **notice** how the **Font Color button proper** changed from red to blue. The button remembers the last color that was selected.

Formatting a Paragraph

Changing alignment

1. **Select** the **first paragraph**.
2. In the **Paragraph** group, **find** the **Align Text** buttons. **Notice** that the **Align Text Left** button is selected (it is grey).

3. **Change** the alignment of the paragraph by **clicking** on the other buttons.
 - a. **Align Left:** Lines the text up against the left margin.
 - b. **Center:** Centers the text on the page. This is good for titles.
 - c. **Align Right:** Lines the text up against the right margin.
 - d. **Justify:** Lines the text up against the left and right margins, resulting in a cleaner look. It accomplishes this by adding extra space between words as necessary (it doesn't add extra space characters; it just makes the space characters wider). Newspapers use this alignment.

Changing line spacing

1. With the first paragraph still selected, in the **Paragraph** group, **click** the **Dialogue Box Launcher** to access more paragraph formatting options.

2. On the **Indents and Spacing** tab, in the **Spacing** section, **click** the **Line spacing** drop-down arrow, and **click Double**.
3. **Click OK**.

Changing paragraph indentation

1. With the first paragraph still selected, in the **Paragraph** group, **click Align Left**.
2. In the **Paragraph** group, **click** the **Dialogue Box Launcher** to access more paragraph formatting options.
 - a. On the **Indents and Spacing** tab, in the **Indentation** section, **click** the **Special** drop-down arrow, and **click First line**. **Click ok**.
 - b. **Notice** how the first line of the paragraph is now indented.

3. Hanging indent (all lines of a paragraph are indented except the first line) - using the same instructions as in step 2 above, **change** the **Special Indentation** to **Hanging**. **Click** ok. Again, **notice** the changes.
4. **Deselect** the text by **clicking** on a clear area.

Controlling the Appearance of your Document

Changing Page Margins

1. **Click** the **Layout** tab to access tools to change the appearance of your document.
2. In the **Page Setup** group, **click Margins**. A list will appear that will have your current settings highlighted. **Click Wide** to see how it will affect your document.
3. **Click Margins** again and **click Custom Margins** at the bottom of the list.
 - a. When the **Page Setup** dialogue box opens, on the **Margins** tab, in the **Margins** section **click** the arrows to **change** the top, left, bottom and right margins to **0.8"**.

- b. The **Gutter** setting is an extra margin that is only used if you want to **bind** your printed pages together in some way (such as with a three-hole-punch). **Leave** this at **0"**.
 - c. **Click OK**.
4. In the **Page Setup** group, **click Margins** again and **notice** how the margin list has now populated with your customization.

Page Breaks

✓ On Exercise

1. **Place** your insertion point at the end of the blue paragraph.
2. On the **Insert** tab, **find** the **Pages** group and **click Page Break**.

Teacher's note:

The **Pages** group may be condensed into a **button** due to the small resolutions of the monitors.
Click the button to reveal the contents of the group.

3. **Notice** how the lines below are now on the next page.
4. **Notice** how Word has inserted some blank space at the top of the next page.
5. **Tap** the **Delete** key to remove this extra space.

Good stopping point for Session 1.

Close "Internet Policy.docx" and **save the changes**.

Describe how the Exercise is organized: The parts in parentheses are hints concerning how to complete each step.

Headers and Footers

A **header** is text that appears at the **top** of every page in your document. Similarly, a **footer** is text that appears at the **bottom** of every page.

1. First, let's insert a **header**.
 - a. **Open** Internet Policy.docx.
 - b. **Tap** **Ctrl** + **Home** to get to the top of the document.
 - c. **Click** the **Insert** tab. In the **Header & Footer** group, **click Header** to open a list of different header options.
 - d. **Scroll** down the menu to view all the options and **click Blank**.
 - e. **Notice** that a new **contextual ribbon** has opened called **Header & Footer Tools**. It has one tab - **Design**.
 - f. **Notice** how Word is calling out the header section with a **dotted-line**.
 - g. **Notice** the words **"Type here"** enclosed in brackets on the left. This is a **placeholder** for an area of the header into which we can enter content. It is **colored gray**, which means it is already selected and ready for us to populate it with content.
 - h. **Type** "Internet Policy".

2. **Close** header. This can be done in two ways:
 - a. On the **Header & Footer Tools** contextual ribbon, on the **Design** tab, **click Close Header and Footer**.

- b. By **double-clicking** anywhere within the body of the document. (We'll try this in a minute)
3. **Scroll down** and **notice** that "Internet Policy" appears at the top of every page.
4. Also **notice** that the font color of the text in the header is light gray. This is not the **actual** font color. Microsoft Word makes the header text display in light grey to show that the header is **not currently active**.
5. **Double-click** on the header to make it active. **Notice** how the font color has changed to its real color (black) and the document body text is now dimmed. Again, this is to show that the header/footer is **active**, and the document body is **not active**.
6. Next, let's insert a **footer**.
 - a. **Note** that, when the header is active, the footer is active as well. **Scroll down** to the bottom of the current page and notice that there is a **Footer** section called-out with a dotted-line.
 - b. On the **Header & Footer Tools** contextual ribbon, on the **Design** tab, locate the **Header & Footer** group. **Click Footer** to open a list of different footer options.
 - c. Again, **scroll down** the list to view all the options and then **click Blank (Three Columns)**.
 - d. What we're going to do is, put our **name** in the left placeholder, the **current date** in the center placeholder, and the **page number** in the right placeholder. There are tools on the Header & Footer Tools contextual ribbon to facilitate this.
 - e. **Click** on the **left** placeholder to select it and **type** your name. Do not tap Enter.
 - f. Let's make our name bold. How would we do this? Because there is no Bold button visible, we have to switch to another ribbon. **Click** the **Home** tab, **locate** the **Font** group and **click Bold**. (no need to highlight the name)
 - g. **Note** how our Header & Footer Tools contextual ribbon is no longer active since we switched to the Home tab. To bring the Header & Footer Tools contextual ribbon back, **click** on its **Design** tab.

- h. **Click** on the middle placeholder in the footer to select it. On the **Header & Footer Tools** ribbon, **locate** the **Insert** group and **click** **Date & Time**. When the dialogue box opens, **click** any date format you wish under the **Available Formats** in the left pane.
- i. **Note** the empty checkbox that says “Update automatically”. This would need to be checked if you want the inserted date to change to the current date every time you open this document.
- ii. **Click** **OK**.
- i. **Click** on the **right** placeholder. On the **Header & Footer Tools** ribbon, **locate** the **Header & Footer** group and **click** **Page Number**. A list of options will be shown about where you want to insert the page numbers (see table below).

Top of Page	Puts the page number in the header. Warning: This will replace your entire header with a new header!
Bottom of Page	Puts the page number in the footer. Warning: This will replace your entire footer with a new footer!
Page Margins	Puts the page number in the left or right margins.
Current Position	Puts the page number wherever your insertion point is.

- j. **Move** your pointer to **Current Position** and a list of options will open. **Scroll down** the list to the “**Page X of Y**” section and **click** **Bold Numbers**.

- k. **Double-click** in the body of the document to close the Header and Footer Tools.

Adding Visual Interest

1. Changing the **Page Background**:

- On the **Design** tab, in the **Page Background** group, **click** **Page Color** to display a palette of colors.
- Mouse-over** the colors and **observe** **Live Preview** changes to your document.
- Click** a color that is **fairly dark** (fourth row of Theme Colors).

Tip: The document's text color automatically changes to white when a dark background color is selected.

2. Adding a **Watermark**:

- On the **Design** tab, in the **Page Background** group, **click** **Watermark** to see a list of semi-transparent messages that can be added to your document. **Click** on one of the messages and **note** it's insertion into the document. These messages will be printed should you print the document.
- You can also **customize** the watermark text. **Click** **Watermark** again and **click** "Custom Watermark". In the Printed Watermark dialogue box, find the Text field, **click** into it, **delete** the existing text, and **type** some different text. **Click** OK.

What's the difference between the "Apply" and "OK" buttons?

- Apply** will commit your changes and **keep** the dialogue box **open**.
- OK** will commit your changes and **close** the dialogue box.

3. Adding a **Page Border**:

On Exercise

- To place a border around your document, on the **Design** tab, in the **Page Background** group, **click** **Page Borders**. A **Borders and Shading Dialogue Box** will open.
- In the **Borders and Shading Dialogue Box**, on the **Page Border tab**, there are options for customizing a border. As you **click** on different settings, styles, colors, etc. in the left and center panes, **note** a preview in the right pane.
- In the **Borders and Shading Dialogue Box**, on the **Page Border tab**, in the *left* pane, click on the **Box** setting.
- In the **Borders and Shading Dialogue Box**, on the **Page Border tab**, in the *center* pane, in the **Art** drop-down list box, **click** the drop-down arrow. **Scroll down** and **click** a border style that you like. **Click** **OK** to add the border.

e. **Note** that, depending on how large the border is, it may **cover up** your **header and/or footer**. To fix this, you can adjust the distance between the edge of the page and the header/footer.

i. **Double-click** on the **header** to make it active.

ii. On the **Header & Footer Tools** contextual ribbon, on the **Design** tab, in the **Position** group, there are two text boxes:

1. The **top** one controls the distance between the **header** and the edge of the page.
2. The **bottom** one controls the distance between the **footer** and the edge of the page.

iii. **Increase** the values in both of these text boxes until you can see your header and footer. Note – you will need to click into the footer before you adjust the bottom control.

4. **Save** the document and then **close** Word.
