

Basics of Google Docs (Lesson 1 Handout)

Google Docs gives users the ability to create and store documents and files using any web browser (in “the cloud”), access them from any device, and give multiple people simultaneous access. “The Cloud” is a phrase that means being able to access information through a web browser that are stored on a company’s computers. This gives you the ability to access them anywhere and share them with others. Heads-up: Google Docs works best in Google Chrome, but you can usually use it in any web browser (Safari, Internet Explorer, Firefox).

To get started, go to drive.google.com and log in to a Google account
OR login to a Gmail account, click on the little grid in the upper-right of the screen (looks like ) and choose ‘Drive’

Create a Google Doc

 Click “New” and “Google Doc” to create a new document in the folder you’re currently viewing	Once you’re in your Google Drive account, click on the ‘New’ button and click on ‘Google Docs’ to create a new Google Doc.
 You can click here to edit the name of this document This tells you that your changes have been saved (it happens automatically)	To change the name of the document, click on the ‘Untitled document’ name in the upper-left corner of the screen and replace it. Press ‘Enter’ or click in the document to save. Your document is constantly automatically saving as long as you are connected to the internet, and it will tell you as much if you look to the right of the ‘Help’ menu.

Edit a Google Doc

To insert a picture, click on the 'Insert' menu and select 'Image.' You can upload a picture from your computer or click on the heading that says 'Search' to use a Google Image. To insert a table, click on the 'Insert' menu, hover over the 'Table' option, and use your cursor to indicate the dimensions of your table.

Download a Google Doc

To download your document as a Microsoft Word document or as a PDF, click the 'File' menu and hover over the 'Download As' option. Once you click on the desired file type, your computer will either download it to your downloads folder or it will ask you where you want to save it (depending on your browser settings). Once you download it, you can open it in another program or attach it to an e-mail.

Share a Google Doc

	Method 1 - send invite To share a Google Doc, locate the blue 'Share' button in the upper-right corner of your browser window and click on it. You can then type the email address(es) of the person(s) you want to share the document with. You can also select what TYPE of access they get (change the "Can edit" option) and type a little message for them. Then you can click 'Send' and they will get an email with an invitation to access the document.
	IF you share a document this way with an email address that is not a Google account, then you will get this warning. The person you share it with will be able to view it, but unless they have a Google Account, they won't be able to edit it.
	Method 2 - use a link Instead of typing the e-mail addresses of specific people, you can click the "Get shareable link" option and it will generate a URL that you can copy and paste into an email to share with others. ANYONE who gets that link can access the Google Doc, so be careful with this option. You can change the type of access associated with the link by clicking the down arrow next to 'can edit' in the picture to the left and choosing a different type of access. Then click 'Copy link' and paste it into any email.

Access a Google Doc

 The screenshot shows an email titled "Example Title - Invitation to edit" from Andrew BoddySpargo (via Google Docs). The email body states: "Andrew BoddySpargo has invited you to edit the following document: Example Title". Below this, there is a profile picture of Andrew BoddySpargo and the text "This is a test to see what the sharing email looks like." followed by a blue "Open in Docs" button. At the bottom, it says "Google Docs: Create and edit documents online. Google Inc. 1600 Amphitheatre Parkway, Mountain View, CA 94043, USA You have received this email because someone shared a document with you from Google Docs."	If someone sends you a Google Doc invitation, this is what the email looks like. It grants only your specific Google Account access to it. Click on the name of the document or the blue button that says “Open in Docs” to access the document. In this example, Andrew has given me editing access to the document, so I can make changes.
 The screenshot shows an email titled "Example Title" from Andrew BoddySpargo. The email body states: "Andrew BoddySpargo has invited you to edit the following document: Example Title". Below this, there is a profile picture of Andrew BoddySpargo and the text "This is a test to show how it doesn't work to share it with non-Google email addresses." followed by a blue "Open in Docs" button. A yellow box contains the text: "This email grants access to this item without logging in. Only forward it to people you trust." At the bottom, it says "Google Docs: Create and edit documents online. Google Inc. 1600 Amphitheatre Parkway, Mountain View, CA 94043, USA You have received this email because someone shared a document with you from Google Docs."	If someone sends an invitation to access a Google Doc to a non-Google email address, this is what it looks like. Because the email address doesn't have a Google account, it grants them access to view it. If they happen to be logged into a Google account, then they will be able to edit the document with that Google account, even though it was shared with the non-Google address. This type of sharing is slightly less secure because if the invitation is forwarded on to someone else, then they could get access, too. It's still slightly more secure than just generating a link, though.
If someone emails you a link to their Google Doc, then generally they will send the whole URL in the body of an email, or they will type an email and create a hyperlink using some of the email text to link to the Google Doc that they're sharing with you.
